

SANDS FACILITIES ACADEMY

INTRODUCTION

Since its inception in 2012, the Sands Facilities Academy has provided practical, high-quality training for our Team Members, supported by a robust assessment system and training database to ensure a systematic, standardised, and professional approach to skills development. Recently enhanced, the Academy collaborates closely with the government to offer apprenticeships for aspiring facility management professionals in Macao and runs programmes to attract young talent. To encourage young people to join the industry, the Academy provides specialised training in facility management for newly hired Team Members and all technical personnel. We are dedicated to helping them gain both local and international certifications, enabling them to achieve the highest professional standards.

HIGHLIGHTS

Practical Training

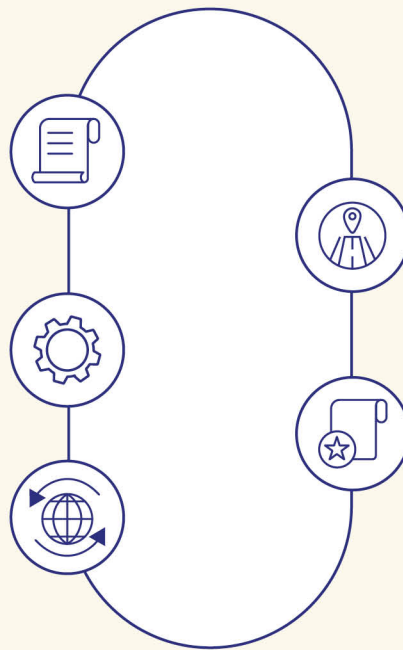

Blending theoretical knowledge with hands-on experience, enabling students to apply their learning in real-world settings.

Interdisciplinary Learning

Integrating principles from management, environmental science, and engineering to develop well-rounded professionals.

Industry Visits & Exchanges

Organising visits to leading facility management companies to expose participants to cutting-edge technologies and broaden their career perspectives.

Personalised Development

Offering tailored learning pathways based on individual interests and career aspirations to support targeted professional growth.

Certification Courses

Equipping Team Members with industry-specific skills, assisting them in obtaining certifications and mastering the latest technologies and best practices.
